I must say be off
The moment is here
It's not a farewell, just a brief goodbye
This party is over now
It made us laugh and cry and dance all night
We leave a part of us in your open hearts
And keep your spell alive with us
Voices of friends joint with the feelings of the people
Keep the music still going on
Late into the daybreak
The eyes of friends and all those people
Are painting the shot of this night
Emotions are flying high
This party is over now
It made us laugh and cry and dance all night
We leave a part of us in your open hearts
And keep your spell alive with us
The music's still playing...
The moment is here...
This party is over now
It made us laugh and cry and dance all night
We leave a part of us in your open hearts
And bring a surge of thrills in our bloods
It's giving us a memory deep inside
We are playing our last song tonight
Your flames are burning out to say goodbye
We hope to see you again, many times
This party is over now...
It's giving us a memory...
