There's something that I like to you tell you
Something between you and me

I would do anything, my baby
I would do anything for you
I give my heart, my life and maybe
Oh, please believe me that my love is true

I'm walking through, my heart is on fire
And you don't know, oh, I miss you so
I'm talking through my heart's desire
I'm telling you what love can do

Every night and every dream
I have a vision that I always see
Thousand light years, you away
I wanna hold you, baby stay

All I want is you and me
That's my only fantasy
The more I dream the less I find
You're always, babe, in my heart

I would do anything, my baby
I would do anything for you
I give my heart, my life and maybe
Oh, please believe me that my love is true

I give you my heart, baby that's true
I only wanna be with you
I give you my love and that's no lie
I only wanna, baby, one more try

Don't bring my heart through time and motion
Oh you don't know oh, I miss you so
Don't break my heart, my true devotion
I'm telling you love

Anytime and anywhere
I see your pictures, oh I swear
Tears may go and years may come
If you would go, I'm so alone

Love is a drama, can't you see?
I own my dream, I never feel free
Lonely words, sense in my heart
Baby, please don't tear my heart

I would do anything, my baby
I would do anything for you
I give my heart, my life and maybe
Oh, please believe me that my love is true

I give you my heart, baby that's true
I only wanna be with you
I give you my love and that's no lie
I only wanna, baby, one more try

I would do anything, my baby
I would do anything for you
I give my heart, my life and maybe
Oh, please believe me that my love is true

I would do anything, my baby
I would do anything for you
I give my heart, my life and maybe
Oh, please believe me that my love is true
