"One Way Mirror"

Visit "[One Way Mirror](#)" on MotoLyrics.com

Take me to a better place

Take me to a better place

On the otherside

On the otherside of life

Take me to a better place

Take me to a better place

On the otherside

On the otherside of life

And I tried, tried, tried

To meet you perception

And though it sounds good on reflection

Didn't promise to embody perfection

And I tried, tried, tried

To meet you perception

And though it sounds good on reflection

Didn't promise to embody perfection

One way mirror

Three wishes I refuse to deliver

You see the things I promise to give you

Abusing my liver

Get closer

The closer you expect it gets clearer

I can see you but you don't see me

I really need you but you don't need me

You see though it all, you see through the one way mirror

You see the things I promise to give you

You see the things I promise to give you

Three wishes I refuse to deliver

Take me to a better place

Take me to a better place
On the otherside
On the otherside of life

And I tried, tried, tried
To be the addiction
But that's the only place I go catch from
You were frosted to me like I was vixen

One way mirror
Three wishes I refuse to deliver
You see the things I promise to give you
The muse and my liver
Get closer
The closer you expect it gets clearer

I can see you but you don't see me
I really need you but you don't need me
You see though it all, you see through the one way mirror
You see the things I promise to give you

You see the things I promise to give you
Three wishes I refuse to deliver
You see the things I promise to give you
Three wishes I refuse to deliver
