"Sword Of Darkness"

Scorching through the icy skies, filled with manic rage
Battle of the Titans, tonight they will invade
Sorcerers around us behold the demon fire
The Swords of Darkness at their side, veild and
awesome power
As the battle rages on, the heavens are destroyed
Darkness falls around, you're lost within a void
Damned are the defiant, cursed are their souls
Those who've felt the wrath of god, many lives they've
stole
Will they ever forget the wicked war they fought
Metal mutants feed upon the corpses as they rot
All you hear are battle cries
