Burned in the scorching land  
When souls dehydrated from a birth  
Wounds bleeding  
Carnage for survival on the Earth  
With spells of Satan  
I summon thee  
We sacrifice this world of shit  
Lords of death descend the fires of glowing hell  
Endless pain Christians dead with smashed heads  
Holocaust unleash the blood of deformed corpses  
Suffer wind burns their souls  
Behead the holy all sacred deceased  
Ripping apart the blessed angels bleeding maggots  
them feast  
Splattered guts of monks  
Internal extraction of hallowed eves  
Dismember for lord black abyss  
Die - crucifixion decapitated  
Die - crucifixion decapitated  
Prince of flies we give you crowded sacrifice  
With my disgust Nazarene and holy church  
All crucifixion will be cremated for your name  
Smell of decaying flesh  
For the space of the endless ways  
Vultures are moaning high  
When angels of darkness feeding the dead  
Denied inverted cross  
Maggots crawling from their heads  
Gods desecration laws you die with cross  
And burn in hell
