The star shines in the night sky  
Dead glowing diminishing out of my inner  
Flesh turns into one spot  
That death glowing spot..  
Yes I was  
When it burned with whole force  
I'm the one talking to you from out of the void  
See what is on my way.  
I am the machine that makes this madness move.  
Help me to run smoother not I won't be back here  
Smile I'm leaving  
Ripping the body from within...  
I was searching for better somewhere  
Enjoy that from inside of your sanity  
Learn the iron force of smashed out eyes  
Understanding, rotting and enjoying.  
We shall live in the perfect world  
Everybody except you - ones  
Who urgently needs  
We shall build the one that won't be able to rot  
And be broken (Jesus)  
I'm leaving without understanding the whole width of  
unwish  
But no more than  
That.
