"Septicemia (festering Sphinctral Malignancy, Part"

Visit "[Septicemia \(festering Sphinctral Malignancy, Part](#)" on MotoLyrics.com

Suffering intolerably from bladder irritability, Emitting
septic belches,
pungent septic funk, Unable to function because of
bowel flaccidity,
Interruption of rectal reflex, a constipated gut... Fecal
inspissation inspire
colonic impaction, Decaying the discharge, ulcerative
colitis, Bodily waste
accumulates from abdominal distention, Perforation of
tissue,
diverticulitis... Indigested splatter, Regurgitated bolus
overflows in your
maw, Atonic bladder, The state of the kidneys is now
piss poor...
Gastro-abdominal nausea increases with the
compression of flatus, Ankylosing
spondylitis renders locomotion an impossibility,
Prolapsing of the sphincter
following violent tenesmus, Bile and chyme seep
through ulcers into the
peritoneal cavity... Microbes dine on enterolithic crust,
Intestines bloated
from bacterial infection, Crepitated bowels move in
disgust, Escherichia coli
mount an insurrection (repeat)... Congenital mega
colon halts manual
disimpaction, Suppositories run over the sealed orifice,
Laxatives
perpetuate the swelling of the abdomen, The catheter
cannot penetrate anal
agenesis... The cardiovascular system is infected
through osmosis, Overwhelmed
by pathogens and bacteria so rank, Mephitic claret
causes equilibrial stasis,
The product; a human septic tank...
