"Heavy Metal: The Black And Silver"

Visit "[Heavy Metal: The Black And Silver](#)" on MotoLyrics.com

It's in the whirlpool, where matter vanishes
Degenerate star, arm of Orion
An iron sun, the forbidden circle
Antimatter is the black horizon
Heavy metal, black and silver
Falling matter of the sun
Folds itself into a place
Where there was never, never one
By starlight, the heaviest will rise up
Magnetic mirror shattered by this blow
A chaos of metal, river of fire
A night sea crossing
The cosmic fluid flows

Heavy metal, black and silver
Falling matter of the sun
Folds itself into a place
Where there was never, never one
Falling matter, from the cross
Freedom that was never lost
Beyond the end, we'll be coming
Beyond time, space and control
Direction - star light
Creation - star bright
Foundation - we forge the Einstein bridge tonight
Spans a river - star light
Become tired - star bright
World - I love darkness
Without end - and I love light
Heavy metal, black and silver
Falling matter of the sun
Folds itself into a place
Where there was never, never, never, never one
