Education, is for the stupid
My concentrations wearing thin
Evolution, you burnt the blueprints
Now just look at the mess we're inn
Quick solutions, to simple problems
I'll tie the nooses for everyone of
Your illusions, they make you useless
So we'll crucify everyone

How can you dictate the rules
When those who have folowed them are screwed
How can you deciede my fate
When there is no fate

I took your problems
I tried to solve them
Its taken me 3 years to see that
I've gave you choices
I gave him voices
And this is how you'll repay me

How can you dictate the rules
When those who have folowed them are screwed
How can you deciede my fate
When there is no fate

Evolution. evolution
Its your disillusion
