Im faceless, for a change, your' waste makes me so  
ashamed

So you embarrass me for one last time, it makes me  
sick where you draw the line

There's heavier things in my old mind than 10 on your'  
distortion dial

(hey) "That's not cool enough", so what the hell is  
wrong with us???

(hey) take me out of here, you can make me disappear

Crazy, my little one - you run around with your mind  
undone

So embrace me, for one last time and forgive me if I  
just can't smile

(hey) etc

Your' postcode is a cancer

It turns your' music black

Sell it to the men in suits and see how they react

You can make me

You can't make me

You can make me
