Your conscience overrides the fears of authoritarian
repercussion,
You bring about ends that cannot be achieved through
rational =

discussion!
So called "terrorist acts" utilized to win the fight for
nature,
Is direct action the solution to problems that frustrate
you?!?!?

PROTEST! RESIST! REASON! INSIST!

The time has come for total global mental realignment,
Misused technology has altered atmosphere, terrain,
and climate.

Change is needed now, but course of action who'll
define it???
Every mind needs a goal - a ladder - work until you
climn it!!!

PROTEST! RESIST! REASON! INSIST!

The time has come for radical wilderness restoration!
Deep ecology must become the religion of future
generations!!!
Economic gains are invalid reasons for nature's
exploitation!
Thwart industrial domination and unmake civilization!!!
