This whole world is fucking sick!!!  
Human stupidity has made me crazed!  
Insanity frees my mind to wander....  
I gleefully ponder humanity's murder!

Thoughts of slaughter fill my head.  
I want to make all humans dead.  
To free the world of the ills  
that manifest from diseased wills.  
My remedy for Earth's situation  
is total human being negation!!!  
Radical global extermination  
The venting of my crazed frustration  
Plants and animals would rejoice  
Freed from evil human ploys  
I've been dismissed as being sick...  
"environmentally romantic",  
but I will have the final laugh

as my own species feels my wrath!!!

No more factories polluting the air I breath!  
No more authority blatantly surpressing me!  
No more politics, mere games for the ethically sick!  
No more fighting wars, human beings will destroy no  
more!!!

No I'm alone, in solitude I freely roam...  
but I'm going mad contemplating the good  
times past...so I enact a frazzled,  
but calmimng new plan,  
splattering my brains across this now free land!

"WHAT DO I WANT? TO FREE THE EARTH,  
TO FREE MANKIND." -- Leonid Andreyev
