Rumanian dictator, emperor for life
Lived a life of luxury shared only by
his wife
Growing fat like pigs, eating meals fit
for a king
Accumulating assets like none you've
ever seen
Now the table's turned, they were stripped
of all they owned
The revolution's cast the dictator from
the throne
With their execution, so ends the tyranny
Two bullets from a rifle set the people free
Fighting for their rights
They toppled the regime
Pillage all their riches
Left them not a thing
Now they know the feeling
To reap the seeds they've sown
Banished from the living
When they were overthrown
How did they feed the enormous greed
It took to satisfy their needs?
They drained the country dry
As thousands had to die
But now the monarchy is nullified!
Chorus
The changing of the guard
They no longer deal the cards
The world demands democracy
It's the dawning of a time
When the system's redefined
Oppression's now a distant memory
Communism yields to the might the
people wield
For a democratic form of government

For their blatant disregard
They have suffered long and hard
It's time for a changing of the guard!
No longer will they rule the land
by genocide

The traces of their empire have all
been liquefied
Political reform has gotten underway
Now they're free to speak, before they'd
only pray
Freedom is contagious, it's spreading
far and wide
The Berlin Wall has fallen, there's no need
to divide
They walk across a border where many
tried and failed
Others died but not in vain, the people
have prevailed.
Fighting for their rights
They toppled the regime
Pillaged all their riches
Left them not a thing
Now they know the feeling
To reap the seeds they've sown
Banished from the living
When they were overthrown
How did they feed the enormous greed
It took to satisfy their needs?
They drained the country dry
As thousands had to die
But now the monarchy is nullified!
Repeat Chorus
