Missiles in america  
Deep down in the ground  
They're pointing straight at russia  
They're pointing all around  
A small red button gently pressed  
Will set those missiles free  
And when they land with one big bang  
The end of you and me  
America leaders - who'll start the war  
Soviet leaders - who'll start the war  
There's missiles in the u.s.s.r  
Pointing straight at you  
Aimed at the united states of america  
Aimed at britain too  
A small red button gently pressed  
Will set those missiles free  
And when they land with one big bang  
No hope for you and me  
America leaders - who'll start the war  
Soviet leaders - who'll start the war  
American leaders  
Who'll start the war  
Who'll be a cowboy  
What's the missiles for
