I learned from before
I learned from an education
There's no use in stopping rain
But I won't let it pour
I won't let precipitation wash all of you away

Are you in this for the love?
Are you in this for another reason?
I hope that you know that I'll always be there for you
Oh

When you show me the love
Cause yeah we switch our style up
When you show me the love
Right man, you caught me but
When you show me the love
Yeah I switched my style up but
You know I'll always be there

When all is said and done
I'm left without an explanation
You said that you wouldn't
Do those things you do
You make me want you
When you know that I'm waiting for an answer.

Are you in this for the love?
Are you in this for another reason?
I hope that you know that I'll always be there for you
Oh

When you show me the love
Cause yeah we switch our style up
When you show me the love
Right man, you caught me but
When you show me the love
Yeah I switched my style up but
You know I'll always be there

From her smile to every part of her style
I know she's beautiful inside and out

To the way her face holds the nose
Pretty chest in the top
Collarbones exposed
I love it
I love it
And I learned from before
And through my education
Something I figured
Ain't no stopping the downpour miss
Cause when I'm around your kiss
And affection, it feels like I take trips for a second but

I learned from before
I learned from an education
There's no use in stopping rain

When you show me the love
Cause yeah we switch our style up
When you show me the love
Ight man, you caught me but
When you show me the love
Yeah I switched my style up but
We got a boogie for you
