Gonna take a chance...
Something new?
Tell me, "What's your dream?"
I'll see through a loupe, try me boy
The feelings of us coming closer
Let's shake more brilliant than the sea

Everything that's supposed to go right
Sometimes goes by without it
But I still believe
Someday, So shine we are! Wow

I feel the brightness love
When you hug the sun
Without leaving one, with you,
There's a happiness we'll grant
If it's a future that the white waves give
We can keep running barefoot

I kept going back in forth in the same place
Even if that was the long way around
It might have been the short way
After being excited
Getting kind of lonely
We have that in common
So shine we are! Wow

I feel the brightness love
It can't be just anyone
The warmth from the hand we held was one
I held my breath at the eyes that looked far away
Because overflowing dreams floated there

Yes I'm gonna feel alright
Gonna take a chance
Let's be happy
All I need is love
Yes I'm gonna feel alright
Gonna take a chance
Let's be happy
All I need is love

Everything that's supposed to go right
Sometimes goes by without it
But I still believe
Someday, So shine we are! Wow

I feel the brightness love
When you hug the sun
Without leaving one, with you,
There's a happiness we'll grant
If it's a future that the white waves give
We can keep running barefoot

I feel the brightness love
It can't be just anyone
The warmth from the hand we held was one
I held my breath at the eyes that looked far away
Because overflowing dreams floated there

Yes I'm gonna feel alright
Gonna take a chance
Let's be happy
All I need is love
Yes I'm gonna feel alright
Gonna take a chance
Let's be happy
All I need is love
