Late at night when it goes quiet
In my heart there is a riot
I just stare out into the night
Hoping things will work out right
I'm not sure what I should do
I can't stop dreaming about you

A thousand faces have been replaced
And all my tastes have lost their taste
And all my discs have been wiped clean
Of all the naked images I've seen
An ancient feeling feeling new
I can't stop dreaming about you

Well I've been here before
On my knees staring at the door
And you don't really like it
If I'm around here
You like it even less if I go somewhere

So I just rock myself to sleep
Me and the secret that I keep
I hear you move in the next room
I won't be there anytime soon
We leave each other black and blue
I can't stop dreaming about you

Well I've been here before
On my knees staring at the door
And you don't really like it
If I'm around here
You like it even less if I go somewhere

Late at night when it goes quiet
In my heart there is a riot
