Girl you are my song
You are the melody and you are the harmony
Girl you're in my mind
Spinning around my brain, and i go insane
You light up my life
You make the sun shine
And you keep away the rain
Sweet is your emotion

Girl you are my song
You are the melody and harmony

Babe you're the only music of my life
If it never ends i'll never tire
When you're happy makes me feel so good
When you're sad, i feel the same way too

You are my song

Girl you are my song
You are the melody and you are the harmony
Girl you're in my mind
Spinning around my brain, and i go insane
You light up my life
You make the sun shine
And you keep away the rain
Sweet is your emotion

Fly listening to you make me feel so light
You're the one who sends me in the sky
You control the rhythm of my heart
And i hope that beat will never stop

You are my girl, you are my song
You are the melody and harmony
Girl you're in my mind
Spinning around my brain, and i go insane
