Your queen needs your sword again
Will you go, go, go, go?
I can not control the men
It is you they follow

They say we'll surely crumble (Won't you fight for me?)
The outside walls will tumble (Won't you fly to me?)
It's time to arm the children (Won't you die for me?)
We watch our city burnin' (And I still believe)

We march into war again
Is there hope, home? No, no
I've been chosen to defend
And it's you I follow

(chorus)

I'll give you my advice
I suggest you run and hide
Live to fight another day (To fight for you)
But you've made up your mind
So I will stay here by your side
And we will walk into the flames!

They say we'll surely crumble

The outside walls will tumble

It's time to arm the children (Won't you die for me?)
We watch our city burnin' (And I still believe)

[x3](And I still believe)
I still believe, I still believe

(And I still believe) Hey, Yeah, Hey, Yeah
(And I still believe) Hey, Yeah
(And I still believe)
I still believe
I still believe
