Visit "[Tongue Tied](#)" on MotoLyrics.com

Bright, cold silver moon
Tonight alone in my room
You were here just yesterday
Slight turn of the head
Eyes end when you said

I guess I need my life to change
Seems like somethings just not the same
What could say?

I need a little more luck than a little bit
'Cause every time I get stuck, the words won't fit
And every time that I try to get tongue tied
I need a little good love to get me by

I need a little more help than a little bit
Like the perfect one word no one should get
'Cause every time that I try to get tongue tied
I need a little good love to me by this time

I stare up at the stars
I wonder just where you are
You feel a million miles away
(I wonder just where you are)

Was it something I said
Or something I never did
Or was I always in the way
(Was it something I did)
Can someone tell me what to say
To just make you stay

I need a little more luck, than a little bit
'Cause every time I get stuck, the words won't fit
And every time that I try to get tongue tied
I need a little good love to get me by

I need a little more help than a little bit
Like the perfect one word no one should get
'Cause every time that I try to get tongue tied
I need a little good love to me by this time

I know it feels like again
To want to be here again
And we could help each other off the ground
So we never fall down again

And what it takes I don't care
We're gonna make it, I swear
And we could help each other off the ground
So we never fall down again, again

I need a little more luck than a little bit
'Cause every time I get stuck, the words won't fit
And every time that I try to get tongue tied
I need a little good love to get me by

I need a little more help than a little bit
Like the perfect one word no one should get
'Cause every time that I try to get tongue tied
I need a little good love to me by this time

I know it feels like again
To want to be here again
And we could help each other off the ground
So we never fall down again

And what it takes I don't care
We're gonna make it, I swear
And we could help each other off the ground
So we never fall down again, again
