For a long long time now just about every night
You found some excuse not to hold me tight
No matter what I do you sit and pout don't let that
doorknob hit you going out

Don't let that doorknob hit you going out honey
Others lips now thrill you there's no doubt
There's no burden like the love you make me live
without

Don't let that doorknob hit you going out
[el.banjo - fiddle]
I've laid awake nights to two or three so near to you but
you're so far from me

The battle's done you won the fight no doubt
Don't let that doorknob hit you going out
Don't let that doorknob hit you...
Don't let that doorknob hit you going out
