Sky lights and city lights are all I see it's wasting away  
I need the city to remind me  
There's love out there to find

You see(?), I'ma thank you,  
'Cause I can't see anything I see through  
I can look straight and I can't believe  
Love is heat is not a burning just a fire train  
I could play along â€¦ i could play it â€¦  
life is not a ...my sin  
But I â€¦ on like a train in move,  
When all I really want is something to come through  
Life keeps on moving even when my eyes stop  
This world It's spinning  
Even when your love is led by heart  
Time's not affected when you decide to just be still  
My thoughts are holding me, it's my will

Sky lights and city lights are all I see it's wasting away  
You came into my life only to waste it away  
Sky lights and city lights are all I see it's wasting away  
I need a city to remind me there's love â€¦  
I can't â€¦ can I whack you?  
Tell myself I've been emotion I can break through  
I'm a twelve floor, in a dark room  
There's no level when you look from my window  
You do justâ€¦  
â€¦live inside this crazy space  
Do we want more hated  
Am I wasting all my time wasting all my pain  
Life keeps on moving even when you are on stop  
This world It's spinning even when you have left my  
heart  
I hear the people move when nothing is moving  
I see the city â€¦.

Sky lights and city lights are all I see it's wasting away  
You came into my life only to waste it away  
Sky lights and city lights are all I see it's wasting away  
I need the city to remind me  
There's love out there to find

Sometime I look at the sky line  
And I don't know if it's the light that makes you â€¦ dark

Hunters, happy to be real  
In a world that's mad faith  
That can't stop me, my life got bad break  
Dreams come through I finally â€¦ myself  
And still wake up every morning and pinch myself  
I'm a role model, she's in a â€¦  
And we both goes but in the role models  
This substance downs to my understanding  
To be flies, gonna be take-offs and landings  
Why you doing this? To get to see the sky line?  
The good I like contract, where do I sign?  
So when I shine, baby you shine  
'Cause life's a bitch, that you â€¦  
I'm so aware to know someone made copy  
My son points at the tv and says pappy  
This reminds me there's people behind me  
God that guide me with you behind me

Chorus:

Sky lights and city lights are all I see it's wasting away  
You came into my life only to waste it away  
Sky lights and city lights are all I see it's wasting away  
I need the city to remind me  
There's love out there to find X2
