We cannot see around it there is just no point to fight  
It  
Even though the government tells us just to stand  
behind  
It  
That's the way they try to bind us tie a rope and then  
Remind us  
Even though the government doesn't even stand  
behind  
And now you want me I don't think so  
You say you need me I don't think so

You're so blind I don't think so  
Can you touch me? I don't think so  
Everyday they try to hide it  
All they do is lie and slight us  
They can't even get it straight  
Years ago watergate  
Sometime we just roll our eyes up pull the shades down  
They despise us  
How come the government doesn't even stand behind
