Ring you neck until it's red and rosy  
With my fist smash your posies  
Ashes to ashes our world falls down  
Feed the poison it tastes like lies  
Wash them down with the tears you cry  
Digest this love I'd rather spit it out  
Hey headache just get out  
Get out  
This birth this life my death  
This hurt this strife my head  
Headbutt gutwrench at night I lie  
With this demon by my side  
Under the scope that is your eye  
I'm the disease from which you die  
Witch hunt cash front rape my soul  
Instinct and convictions from me you stole  
Hand job blow job no job  
Rack my brain at night over you  
It's all me never you  
I'm the monster who created this hell  
That I put you through  
Gave up fist fucked system bucked  
From all your problems you run away  
I'll never be the same  
Never feel the same  
Tired of hearing you shout  
From my head just get out  
Used to love you used to need you  
Used to feel you just get the hell out  
Won't care won't need  
Won't want won't breathe  
Won't love won't feel  
Just get out
