A choice is made
A life is saved
And no one really noticed
The chance he had
But never used
'cause he did not focus

Is this what you want now
Is this what I get now
I just wanted you
To know my name

The words she said
My mind is fed

A feeling of relief
The choice she made
The gift she trade
But will she ever breathe

The time has come
To scream out loud
And read between the lines
I never thought
This feeling would
Shiver down my spine
