I can't be that other woman (x2)

You only see me every Friday night at 9
Can't imagine what you told her this time
U never take me to a public place
Worried that somebody might notice your face
First to the liquor store and then a motel
Call up your friends just to cover your trail
Not a word until the week goes by
You call me when u want some pie

Why am I crying every night over you?
Your never gonna leave her
Finally I woke up and smelt the coffee
I understand
Why two women can't share one man

I Can't be that other woman
I can't love you down cant keep creepin around
Can't be that other woman
Yes I want u bad
But she needs u much more
Can't be that other woman
I can't love it down cant keep creeping around
Can't be that other woman
Yes I want u bad
But she needs u much more

You never see me on the holidays
U disappear and won't return my page
U take my body in the middle of the night
I ain't gon lie coz boy you do it so right
And then u melt me with them same 3 words
Sweetest seduction that I ever heard
And in the morning at the sun rise
U run to her I realize

Why am I crying every night over you?
Your never gonna leave her
Finally I woke up and smelt the coffee
I understand
Why two women can't share one man

Can't be that other woman

I can't love you down cant keep creapin around

Can't be that other woman

Yes I want u bad

But she needs u much more

Can't be that other woman

I can't love you down cant keep creeping around

Can't be that other woman

Yes I want u bad

But she needs u much more

Can I get a witness (yes u can)

can I get a witness (oh yeh oh yeh yeh yeh)

Can I get a witness (you know u can)

Have u ever been in love with another girl's man

Can I get a witness (yes u can)

Can I get a witness (oh yeh oh yeh yeh yeh)

You said you'd leave a thousand time

But I wont believe till the papers are signed

I cant be that other woman

I wont believe it no

I gotta be the only one

Yes I want u bad but she needs you much more

Can't be that other woman

I can't look it down cant keep creapin around

Can't be that other woman

Yes I want u bad

But she needs u much more

In the morning with the sunrise you will run to her

No your never gonna leave her

So I'm saying goodbye

In the morning with the sunrise you will run to her

No your never gonna leave her

So I'm saying goodbye

Can't be that other woman

I can't look it down cant keep creapin around

Can't be that other woman

Yes I want u bad

But she needs u much more

(repeat till fade)
