In the night I find to you and call your number  
I'm creep under the load of my chains  
The torture never stop  
I must last my miserable life can go this short way  
Cables guide in my past time my negative impulse

[Chorus:]

Call me The Tempter  
Help me with my pain  
I'm Doctor Tempter  
Torture in my brain  
I'm the fake healer  
Give me medicine to get the power

In my dreams I see the light a near wide open door  
I need a leader with healing hands must pull me out of  
dark

[Chorus]

From the fire make of agony slide in cold seas  
I rip the cables out of my flesh forget my past life
