Let me introduce you to a pair
That strikes crude oil but I see pyrite
It is the same old pattern
The goose that feeds the gander
They choose to act but not I

Planting the seeds you sow
Is easier than growing the [Incomprehensible]

Let's go outside and it might restore us
More for the fire that fights for the freeze now
Mechanical

So then the pair proceeded
Another pulse defeated, can't say that I am surprised
It is the fly trap's color that caused the fall into her
Whatever is the shade that you saw?

Planting the seeds you sow
Is easier than growing burrow

Let's go outside and it might restore us
More for the fire that fights for the freeze now
Mechanical

Bound by the salt not your earth
The hat mocks the rabbit
While the bee stings the shark
Stop the start, these are my disguises

Planting the seeds you sow
Is easier than growing the [Incomprehensible]

Let's go outside and it might restore us
More for the fire that fights for the freeze now
Let's go outside and it might restore us
More for the fire that fights for the freeze now
Mechanical
