

## Fair Warning

### "Hold Me"

Life is kinda crazy  
How did I know  
That I'd end up with you  
And now I want you to hold me  
While I make sweet love to you

Whoa now, while the gentle breezes bathe  
World  
And the tender feelings blow right through  
my mind  
Whoa now, while I'm still dazzled by your touch  
And the secrets that we share will keep us warm

I want you to hold me while the shadows bathe the  
World

I want you to hold me while and tell me I'm your only  
girl  
I want you to thrill me and when you're through it's  
Natural to say "I love you"

You and I are beginning  
Even though we've been here for years  
And you know every inch of me  
Topography of body and map into my soul

Whoa now, come closer baby, closer still  
Till I can't tell where I end and you begin  
Whoa say, say those three words I long to hear  
And then my darlin' come on in

(repeat chorus)
