A ring of ice - around you heart  
You lost control - right to the dark  
And in your dreams - the night comes down  
The power that you wanted -  
It turned your heart to stone

Hey look at you - so full of doubt  
Those wasted years - you see them now  
And deep inside - the prize is due  
You're bound to pay it back now -  
And no one else can do

For now - it's suddenly you find  
The road you left behind you -  
It's only in your mind  
And now - you realize the truth  
There's nothing left inside you -  
And nothing left to loose

Time will tell - Only time will tell

A burning heart - that went astray

A searching mind - who lost the way  
And looking back - you're torn apart  
Your life it was so easy -  
And now it seems so hard

For now - a lonely road you go  
I still can hear your laughter -  
Little did you know

Time will tell - Only time will tell

Time will tell - Only time will tell...  
Only time will tell - Only time will -  
Time will tell...
