Lullabies from Tennessee  
Are pleasing to the ear indeed  
But they're not any use to me

'Cause words and music strung together  
Won't make love last forever  
So goodbye to Songtown  
It fooled me for a while  
But now I see that I was blind

So I change the radio station  
To news and conversation  
And say goodbye to Songtown  
It woo'ed me for a while  
But I was just a child

All alone, just me and my loneliness  
The angels come down with their promises  
Singing their lies in rhythm and rhyme

So don't let the moon come out tonight  
Or the stars litter the sky  
It's goodbye to Songtown  
There should be some kind of law  
So it can't happen any more
