You sit around and talk  
Behind each other's backs  
The rumors get around  
And you're left feeling down

All you'll ever be  
Trapped in your circles  
I never want to be  
Trapped in your circles  
But everytime I stop I see  
I'm trapped in your circles

You think you'll be safe

Hiding behind your friends  
But remember nothing's real  
About the way they feel

All you'll ever be  
Is trapped in your circles  
Never want to be  
Trapped in your circles  
But everytime I stop I see  
I'm trapped in your circles
