When the lights go down  
Can we fill up the pan in the bloom in his hand  
In some diver cross town  
Can we wipin' the barn and mopping the floor  
Countless tales knocking the doors  
Restless devils that tears them apart, another round  
When the lights go down  
Should we we call up a friend from the Mercedes Benz  
But it's too late now  
It was there for the fame of the flashing thrill  
Dropped the name of the parties hits  
It's another stuff for those hearts who would heal  
without a sound

When the lights go down  
And there's nothing left to be  
When the lights go down  
And the truth is all you see

When you feel my heart inside of your soul  
Wonder what's you name when we all find out  
When the lights go down

When the lights go down  
At the end of the day  
With this game that I play  
It's gone another round  
As I lay there alone in this big twin bed  
Nothing but thoughts of you in my mind  
I think of the means I wish I've said when you were still  
around

When the lights go down  
And there's nothing left to be  
When the lights go down  
And the truth is all you see  
And I wonder if all the ??  
Yeah, when the lights go down, oh
