"What She Will"

Visit "[What She Will](#)" on MotoLyrics.com

It's the way she smiles
And the way she walks
The way her lip curls when she talks
It's what she says
And what she don't
It's what she will and what she won't
She makes me shake
She makes me scream
She makes me breakfast in between
Her ruby lips
Her emerald eyes
When she can't, it's the way she tries
It's the way her arms warm me like whiskey
The way she whispers baby
Did you miss me
CHORUS
It's what she says
And what she don't
It's what she will
And what she won't
She wraps herself around me
So tight
The way she holds onto me
All night, all night, all night
It's the way she shivers in my hands
The way she tells me only I can
CHORUS
It's all right what she will
What she do and what she don't
She's all right, what she will
What she will and what she won't
