(another piece) ooh yeeah
Guess I heard it thousands time before
when you --- yeeah
you keep crawling to my door

Guess I've seen you begging me for more
got the place to go no
and you promise me for sure

Look into your eyes who cannot hide
I see the smile
I'm fed up with your lies

Take another piece of my heart
I will never ever fall apart
I was strong enough from the start
can you see the crushes come and go?
I will always hit the charge
take another piece of my heart
I can really make it on my own

Telling you I made up my mind
and I'll never turn back
leaving memories behind
Telling you the very last time
I will let you go off
it doesn't really matter what you do

I look into your eyes who cannot hide
I see your smile
I'm fed up with your lies

Take another piece of my heart
I will never ever fall apart
I was strong enough from the start
can you see the crushes come and go?
I will always hit the charge
take another piece of my heart
I can really make it on my own

I'm the lucky one

on a solid ground
'cause I know where I'm going and who I am
I'm the happy kind
but I'm not that blind
to be cheated by someone like you

take another piece of my heart
ooh come take another piece (another piece)
ooh come take another piece my baby
come take another piece of my heart

Take another piece of my heart
I will never ever fall apart
I was strong enough from the start
can you see the crushes come and go?
I will always hit the charge
take another piece of my heart
I can really make it on my own

I'm the lucky one
on a solid ground
'cause I know where I'm going and who I am
I'm the happy kind
but I'm not that blind
to be cheated by someone like you

take another piece of my heart
