Mmm...

Here, at the peaceful break of day, there's a feeling
life is breathin' again
The winds of mercy throw the heavy clouds away
And in heaven, no more teardrops turn to rain
Ooh
(We can hear a distant song) that will stay in our hearts
forever
(Words that lay us still the star)

An angel passed me by so high up in the sky
But she turned around and let her smile shine on down
Like a warm morning sun, like the stars laid one by one
Showin' us a wonder that is all the while all around -
Eternal love

And when the night is closin' in, there's a moment when
we safely breathe as one
Ooh
(The wind that slowly past the years)
Brings the sun down a thousand roses

An angel passed me by so high up in the sky
But she turned around and let her smile shine on down
Like a warm morning sun, like the stars laid one by one
Showin' us a wonder that is all the while all around -
Eternal love
Oh... oh... oh

(Spanish version of the chorus)
