and to think its all a game  
a game i'd never play  
inside ur mind

now i know its in my head  
the chord i never play  
when ur around

im still here playin my guitar  
thinking of u  
and u dont even know who am i

and to remind all that thing u did  
that u dont know what u did for  
it aint alive

did u even know it was all a lie  
this shit that happened to us  
and i knew u'd never mind

so what does it feel  
when u dont belong even in ur own mind

feeling alone when im with u  
feeling so empty when ur not here  
feeling so high(odd) when i finish my song

i never thought this could be real  
this shit we're supposed to feel  
that i cant even xpress well

when i say i love u i really do  
but just imagine me loving u  
well just imagine me loving u (yeah)
