Brian:

The sixties brought the hippie breed  
And decades later things have changed indeed  
We've lost the values but we kept the weed  
You've got a lot to see.

The Reagan years have laid the frame  
For movies stars to play the Whitehouse game  
We're not to far from voting Feldman-Haim  
You've got a lot to see.

The town of Vegas has got a different face  
Because it's a family place with lots to do

Where in the fifties a man could mingle with scores  
Of all the seediest whores, well now his children can  
too.

You've heard it from the canine's mouth,  
The country's changed, that is except the South, and  
you'll agree

No one really knows, my dear lady friend,  
Just quite how it all will end  
So hurry cause you've got a lot to see.

The baldness gene was cause for dread  
But that's a fear that you can put to bed  
They'll shave your ass and glue it on your head  
You've got a lot to see

The PC age has moved the bar,  
A word like "redneck" is a step too far  
The proper term is "Country Music Star"  
You've got a lot to see

Our flashy cell phones make people mumble gee whiz  
Look how important he is, his life must rule  
You'll get a tumor but on your sugery day  
The doc will see it and say "wow you must really be  
cool"

Tom Tucker:  
There's lots of things you may have missed

Adam West:  
Like Pee Wee and his famous wrist

Clevend:  
Or Sandy Duncan's creepy phony eye.

Neil Goldman:  
That awesome Thundercats cartoon.

Diane Simmons:  
Neil Armstrong landing on the moon.

Meg Griffen:  
Neil armstrong wait was he that trumpet guy?

Brian:  
So let's go see the USA  
They'll treat you right unless you're black or gay or  
Cherokee  
But you can forigve the world and its flaws  
And follow me there because  
You've still got a hell of a lot to see.  
You've got a lot to see.
