[Chorus:]

Its a small world after all

Its fan

Its fan you know what the name is

Spitting rhymes you know what the game is

I goy some stuff I wanna bring up

I have an album on the way

Just need to love and hug and Brotherly love

What they do to us

Cause you never know who you might meet

Bird or a kid on the streets

[Chorus]

Life is short and the world is small

You never know when you might fall

Stop the fighting it could last forever

Were all here on this earth together

[Hook]

Cant we all just get along

Hold hands around a fire and sing my song

Holla dogg just put a smile on your face

So we can live together

In this happy place

[Hook 2]

Everbody get your smile going on

Get together and sing my song 2x

United we stand divided we fall

Come together we can have a ball

[Chorus]

So I'm just tryin' to get my point across

I hope you all don't get lost

But if you are it's OK cause I'll help you out

That's what being friends is all about

In a world so small

Lend a hand that well stress a little less it's easy for us

to blow it
Don't you just know it
I'll teach you what it is to live
Its the same fundamentals you use to forgive I can
teach you what it is to be kind
Just open up and expand your mind

[Hook Chorus]

I'm a small girl in a small world [2x]

[Hook 2]

[Chorus]
