We tried to reach the islands  
Where dreams can never die  
We crossed the ocean of the world  
We went through rain and lightning  
And lost our love inside  
Oh, baby save me from the blues

There will be no light  
At night when guardian angels cry  
We better hide  
At night when guardian angels cry  
The other side of love  
Is hidden in the dark  
And tears will come with a sign  
Don't break my heart  
At night when guardian angels cry

We tried to cross the border  
From love to ecstasy  
But there was nothing  
Left to say  
We learned to kill our feelings  
To set emotions free  
The gods of twilight never wait

When guardian angels cry  
You pray as we'll be away  
The tears keep falling  
Like a lover ..... rain  
And in the morning  
They're all gone  
And they'll never come back
