Hey Girly where'd you get those moves
Teenage tragedy taught her the motions
She's got a smile that will make you sweat
She's got a habit of getting undressed

Lets make a night of this
Cause there's nowhere else I'd rather be
She takes the best of me
And I'll take everything that she's got to give

She's got me figured out
What I'm all about
And when you scream and shout
Girl I shut down
She's got me figured out
What I'm all about
And when you scream and shout
Girl I shut down

Slide across the floor, show me what you've got
Baby keep it up cause we're young and reckless
Tell me that you miss me as if I've forgot
You're sure to break some hearts when they see you
shake that thing

She keeps me second guessing
With every situation that she puts me through
I won't lie, it's slightly depressing
When the lights are low, I love what she can do

I can fall in love with just one touch
And all the things that she does
I can't catch my breath
Nooooo

[Chorus]

Shake that thing

[Chorus]
