"Zoom"

Visit "[Zoom](#)" on MotoLyrics.com

Zoom, just one look and then my heart went boom
Suddenly and we were on the moon
Flying high on the neon sky, oh

Bang, just one touch and
All the church bells rang
Heaven called and all the angel sang
Sunrise shine in the morning sky, oh

Zoom, you chase the day away
High noon, the moon
And stars came out to play
Then my whole wide world went zoom
(I passed the rainbow as it went flying by
Faster and faster we were higher than high)

For once in my lifetime I was finally free
And you came back to me

Oh, zoom you chase the day away High noon
The moon and stars came out to play
Then my whole world went zoom

Moonbeams dancing in the afternoon
Shadows blowing as the roses bloom
Looking down on a wonderland, oh

Smack, just one kiss and I was outta whack
All at once there was no turnin' back
Oh so far above the brightest star, oh
