Under the spotlight  
I feel our world's becoming one  
Around me I feel  
Everything we are, everything we see  
I'll take a part of you  
You take a part of me

Knowing at a glance  
Where we all stand  
Searching for another chance  
To make us all one

Above the staring eyes  
I sense that you and I are one  
Knowing, showing  
Everything we are, everything we see  
I'll take a part of you  
You take a part of me

Knowing at a glance  
Where we all stand  
Searching for another chance  
To make us all one

Now I know, we are one now  
Now I know, we are one now  
Now I know, we are one now  
Now I know, we are one now

After the fading lights  
I felt that we were one  
I know I need  
Everything we are, everything we see  
I took a part of you  
You took a part of me

Knowing at a glance  
Where we all stand  
Searching for another chance  
To make us all one
