A man held hostage by this contagion  
Alone abandoned in search of legion  
Under pressure under black skies

We must find the cure before we die  
I can see the bullets rip inside the crossfire  
My suicide runs through the razor wire

All must endure  
We will not live forever  
All must endure  
We will not live forever

Terror awaits me at every turn  
Honor is stronger, we fight all at once

Hate spreads like wildfire in foreign lands  
Incurable pain, is this gun in my hand

All must endure  
We will not live forever  
All must endure  
We will not live forever

Who wants to live  
Who wants to live forever

All must endure  
We will not live forever  
All must endure  
We will not live forever

All must endure  
For the mercy of one  
All must endure  
For the mercy of one

Mercy of one  
Mercy of one  
Mercy of one
