HERE it comes

Noise in the machine
A world of lies backfires on you
Choke cause and effect
Built to collapse the final breakdown

To the system
To the system

Fire weapons of fear
Human affliction ever grinding us down
Blood fuels the engine of dissension
We are scabs and the scars now

We are nothing to the system
We are nothing to the system

To the system
System
To the system

We are nothing in the end
Betrayed and disowned
To suffer alone
We are nothing in the end
Betrayed and disowned
To suffer alone

We are nothing to the system
We are nothing to the system

To the system
System
To the system
