

Fear Like Us

"Neo cons"

Visit "[Neo cons](#)" on MotoLyrics.com

All the words we've shared with desperation and hope
will not stop tonight

Well they haven't beat us or what's in our hearts

So lets fight for a life that others would give up

They say "peace" but they are not doing anything to
aid or endure it

The last thing they want is for you to feel secure, so let
their wars go on and on

I wanna stand for those who need us most

And laugh at the times we've taken ourselves too
seriously

Well I can't do that with my head in my hands

Sometimes we need ourselves more than other need
us

They say "peace" but they are not doing anything to
aid or endure it

The last thing they want is for you to feel secure, so let
their wars go on and on

Buildings are disappearing and it reminds me how
quick we forget

I feel the loss of loved ones, I guess a positive is the
perspective

We all feel the loss
