Emily

Nocturnal shades of blue dance before her eyes,
And call to me pleading please don't lie.

In her darkest hour

Emily knows

The fate of whores...

Who lie down...

And swear the sacred words.

Love was just something I did to survive

Love was just something I did to get by.

Like a circus clown with her painted frown.

Sun going down and the long night begins.

Harvest

Where will you run to now?

You've betrayed all who cared.

Harvest.

Love was just something I did to survive

Love was just something I did to get by.

It never changes,

It goes round,

And round,

Round...

You've got the need I got you suck me or you rot
