"Children Of The Sun"

Visit "[Children Of The Sun](#)" on MotoLyrics.com

Standing in an open space
Surrounded by views as you escape
You find a place

Forgotten what it's like to lose
Freedom and the right for you to choose
Which step to take
As we go through this life

Things can get a little bit twisted
From time to time
But we know when it's right

It's then when we go
We take fire from the Sun
This Planet's cold
We'll find some place we belong
We've been shining in the dark
Holding on together
Just like children of the Sun

Feeling like we're here again
Staring in the face of circumstance
We understand
Fortunes flying in the wind
Turning every corner in this town
No place to land
As we go through this life

Things can get a little bit twisted
From time to time
But we know when it's right

It's then when we go
We take fire from the Sun
This Planet's cold
We'll find some place we belong
We've been shining in the dark
Holding on together
Just like children of the Sun

We will never feel alone again
As we walk across greener land
As we climb up from a place below
Feel low
We are guided by a safer hand
Something tells us not to look back down
All of this can be yours

It's then when we go
We take fire from the Sun
This Planet's cold
We'll find some place we belong
We've been shining in the dark
Holding on together
Just like children of the Sun

We're like children of the Sun
