I hate the Beach Boys (I stay indoors all day)

Give me my raincoat (Draw the curtains closed)

On all the brightest days (I stay indoors all day)

I listen to Leonard Cohen (I'm so tired of sunshine)

Songs of gloom (Can't wait for the nighttime)

So into my room

Go away (Winter never comes to this place)

Please let (There's always sunny weather)

Me go where (I've been warm for too long)

Air is cold (Let me go where the air is cold)

But when the night falls (I toss and turn til dawn)

And I am dreaming (Sunlight fills my nightmares)

Two girls for every boy (I toss and turn the whole night through)

Why don't they wear something modest (I'm so tired of sunshine)

On the sand in August (Even in the nighttime)

Should be banned

Go away (Winter never comes to this place)

Please let (There's always sunny weather)

Me go where (I've been warm for too long)

Air is cold (Let me go where the air is cold)

Where air is cold (Let me go where the air is cold)

Where air is cold (Let me go where the air is cold)

Let me go away

Again, again, I remember

Again, again, I remember

When I met her, it was raining

A little sunburn (The sun gets brighter every day)

Could give me cancer (The sun gets brighter every day)

Protect my chromosomes (The sun gets brighter every day)

Please keep me free from melanoma (I'm so tired of sunshine)

I'll move to Tacoma (Can't wait for the nighttime)

Sing yahoo

Go away (Winter never comes to this place)

Please let (There's always sunny weather)

Me go where (I've been warm for too long)

Air is cold (Let me go where the air is cold)

Where air is cold (Let me go where the air is cold)

Where air is cold (Let me go where the air is cold)

Let me go away

Again, again, I remember

Again, again, I remember

When I met her, it was raining
