

## Feel "Come On Down"

Visit "[Come On Down](#)" on [MotoLyrics.com](https://MotoLyrics.com)

One day I had it all figured out  
I was breakin the champagne out  
It was just the 2 of us  
No ones a round  
Next day, life got tossed around  
Like a fish flappin on the ground  
Well that's just lifes ups and lifes downs  
Today, can I handle the whole wide world?  
Can I put a smile on a girl?  
If you feel like I do  
Forget everything anyone ever said and just  
CHORUS:  
Come on down  
Lets go out  
Don't be scared to shout it out loud  
Were alive  
Were all right  
Don't be scared to shout it out loud

You got the game down  
I heard there's an art to life  
And it's not just black and white  
Its your own design, your own time  
So I painted a different mind  
It was multi-colored and wild  
With a few dark tones so I could feel both sides  
Today can you handle the whole wide world?  
Can you put a smile on a girl?  
Well If you feel like I do  
Forget everything anyone ever said and just  
Repeat Chorus  
Youre showin the world now  
Forget everything anyone ever said and just  
Repeat Chorus
